Massage intensity, location and pattern can be precisely tailored to the user’s condition and preferences.

**Quattro Motion Control**

Equipped with four nozzles for precision water stream control, allowing massage patterns to be tailored to each user’s body size and shape.

Nozzle position automatically adjusts to suit each user’s height and shoulder width.

**Use all four nozzles to massage two body parts simultaneously**

By using four nozzles, two body parts can be massaged at the same time. The result is a more efficient massage than can be given with two nozzles.

Ex.) Around the shoulder blade and chest

Upper back and lower back

Lower back and thigh

**Use two nozzles for strong water pressure**

When using two nozzles, the massage pressure is 25% stronger than when using four nozzles.
Carefully designed for maximum safety

Easy to get on
At a height of 490mm, the bed is easy to sit down on, even for smaller people.

Easy to grip the handrails
Long and short hand rails are included as standard equipment. Easy-to-grip shape allows you to sit down safely.

Easy to move around on
Quattromano is designed to limit sinking when you sit down on it, for increased stability.

Easy to grip the frame
The edges of the bed were designed with an easy-to-grip shape, for increased safety and ease when getting on and off.

Easy to get off
Designed with ample foot space around the bed, making it easy to stand up.

Intricately and compassionately designed for a comfortable, soothing relaxation experience

Designed for quietness
Efficient ventilation to reduce mechanical humming noise.

Comfortable water temperature
The radiant temperature can be set, allowing for a more comfortable treatment.

Motion sickness mitigation
Original, anti-wave design helps prevent motion sickness by limiting motion during treatment.

Soft music from two speakers
The headrest side has two built-in speakers, so you can relax to pleasant melodies during treatment.

Designed with user-friendly functionality in mind

Easy-to-operate touch panel
Quattromano is equipped with a colored LCD touch panel for increased visibility and ease of use.

Control panel placement flexibility
The control panel can be placed at whichever of the corners is most suitable for your location.

Space-saving
Quattromano is shorter in length than its predecessor model, in order to make efficient use of limited space.
### Rated power supply
Single phase 200 to 240V AC, 50/60Hz

### External dimensions
820 (W) x 2,330 (L) x 840 (H) mm

### Weight
Approx. 220 kg (Approx. 450 kg at water filled)

### Intensity level
5 levels (1 to 5)

### Preheating temperature
25 to 40°C

### Operating environment
Ambient temperature: 10 to 28°C

### Function
Quatro motion control mechanism, preheating timer, automatic purge mechanism
